### **DETAILED ACTION**

Applicant's amendment of claims, 2-26 and the addition of new claim 27, in the paper of 10/13/2004, are acknowledged.

Claims 1-27 are pending and at issue.

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-23, 26, drawn to variant archael DNA polymerase.

Group II, claim(s) 24, drawn to polynucleotide encoding a variant archael DNA polymerase.

Group III, claim(s) 25, drawn to method of amplifying DNA.

The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a technical relationship among those inventions involving one or more of the same or corresponding special technical features. The expression

Art Unit: 1652

"special technical features" shall mean those technical features that define a contribution which each of the claimed inventions, considered as a whole, makes over the prior art. U.S. Patent No. 5,827,716 teaches a modified *Pyrococcus furiosus* DNA polymerase in which the wild-type amino acid sequence is modified in the amino-terminal portion of the polymerase, specifically an alanine is inserted into position 2 of the polymerase ( see paragraph 27). Thus, the shared technical feature of the groups is not a "special technical feature", unity of invention between the groups does not exist.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
